

PROVEN RESULTS IN ONE PASS

ASI CREATED THE GSB-FRICTION SEAL® SYSTEM

For more than 40 years, Asphalt Systems Inc. (ASI) has provided consultation and products to significantly extend the life of asphalt pavement on roads and airfields around the world. ASI works with cities and counties, engineering firms, airports, the Federal Aviation Administration (FAA), the Department of Defense (DOD), State Departments of Transportation (DOTs), and international government officials. ASI's people are sought-after experts and its products are proven to be effective, economically exceptional, and environmentally friendly.

GEE ASPHALT SYSTEMS, INC.

The exclusive applicator for GSB-Friction Seal® on roadways in IA, MO, and AR.

GSB-FRICTION SEAL® SYSTEM

FRICTION-POSITIVE, RESTORATIVE, AND PROTECTIVE SEAL

HIGH-PERFORMANCE ASPHALT PAVEMENT PRESERVATION

EXTEND PAVEMENT LIFE AND ADD FRICTIONAL PROPERTIES IN ONE PASS

The GSB-Friction Seal® System provides a friction-positive, restorative, and protective seal that is far more robust than a fog seal, yet not so thick that it builds up along concrete curb and gutter lines. It integrates into the pavement, becoming part of the surface matrix, to restore, restructure, strengthen, and protect the aging pavement, while leaving a tough and safe seal on the surface — all in one easy pass. Once applied, this durable, non-cracking, non-delaminating seal will preserve your asphalt for years.

PROVEN RESULTS

The GSB-Friction Seal® System draws from the superior chemistry we have used in our GSB products for more than 40 years. It halts surface deterioration, extends service life, and increases PCI — as it also helps to maintain surface friction.

LESS HASSLE NOW AND LATER

In just a matter of minutes, you get a super seal with a pleasing, problem-free, long-term surface, integrated right into your pavement — all in a simple, single-truck, single-pass process, with no rolling or sweeping, and a 2- to 4-hour return to traffic. And unlike other treatments that leave you scrambling to hide your pavement problems after a couple of applications, there is no risk of downstream complications with GSB-Friction Seal®, because it integrates right into your pavement.

THE GSB-FRICTION SEAL® SYSTEM

The system includes our proprietary GSB-Friction Seal® liquid, exceptionally hard and angular GSB-Friction Seal® aggregate, and our innovative synchronous material-application distribution unit.

BASED ON SOUND SCIENCE

GSB products are inherently anti-aging. Oxidation ruins asphalt pavement binder. Our unique GSB chemistry slows the molecular aging and deterioration reactions in pavement binder oils, so it keeps the binder healthy.
